Pre-Installation of Okta Verify to enable sign in with Okta FastPass

Summary: Installing Okta Verify

The Goal

To ensure a smooth transition to the new login experience, all users must pre-install the **Okta Verify** application.

Installation Steps (Please complete these now!)

- **Step 1: Download the Installer** – Download the Okta Verify setup file from the link mentioned in the next page.

- **Step 2: Run the Setup** – Launch the installer and follow the standard prompts to install the application to your workstation.

- **Step 3: Verify Installation** – Confirm that the "Okta Verify" icon appears in your system tray (Windows) or menu bar (Mac).

Note: For any assistance with the installation, you will need to contact your organization's IT department. Please do not contact Virtusa for the installation of Okta Verify in you workstation; your workstation is managed by your organization.

What Happens Next? (Launch Day)

- **Do Not Register Yet** – Device registration and FastPass setup will occur **only after** the new login portal is officially launched.

- **Tutorials Available** – Once we go live, you can follow the link – **Okta Registration Guide** on the login page for step-by-step registration guidance.

- **Support for Registration** – If you encounter errors during the registration phase, please contact us via **Product Support Portal**.

Why this matters:

Having the software ready on your machine now will prevent delays when we switch to the new authentication method, ensuring you maintain uninterrupted access to the product.
